

Breathe Easy with Luvin Life Himalayan Crystal Salt Lamps!

Himalayan Salt Lamps are Nature's very own air purifier !
Simply plug in and turn on a few Himalayan Salt Lamps
around the home and office and instantly feel the difference.

Through attracting and evaporating moisture in the air,
Himalayan Salt Lamps produce and release negatively charged
ions into the atmosphere, instantly negating the harmful
effects of the positively charged ions (generated by electrical
equipment) saturating our living/working spaces.

The How, Where and Why of Salt Lamps

- Our lamps are made of natural crystal salt sourced from underground salt mines in the foothills of the Himalayas.
- All these beautiful and individually unique lamps are mounted on a wooden base.
- Heat from the bulb assists in the emission of negative ions
- Lamp-created negative ions bond with pollutants (positive ions) and neutralise them - removing them from the air.
- Negative ions combat electro-smog caused by electrical devices (TV's, mobile phones, lighting, wireless networks).
- Relief from asthma, allergies and other complaints are commonly reported to us from our happy clients.
- These products not only cleanse the air naturally, but are an extremely beautiful addition to any home or office.

All lamps come with a UL certified
dimmer cord and certified 25w bulb.

Use and Care Instructions

To Use:

1. Remove electrical cord from protective packaging.
2. Place the supplied Luvin Life light bulb in included socket and screw in gently until secure.
3. Using the opening on the underside of the lamp base, insert light socket into the Salt Lamp and adjust until secure.
4. Plug in and switch on.

NOTE: Ensure power is turned off when plugging in, unplugging, moving the lamp or changing the bulb.

To Maintain:

While Luvin Life Himalayan Crystal Salt Lamps are 'rock' like and very durable, if the following simple steps are taken they should last for years.

- Safe to wipe with damp cloth. Excess water will dissolve the salt.
- Placement - not suitable for rooms with excess humidity such as bathrooms or outdoors.
- For best results, we recommend leaving the lamp on as often as possible.
- The lamp will tell you if it is not being used enough by pooling moisture, but ultimately you benefit from having the lamp on more often than not.
- If not in use (and the lamp is dry) we recommend wrapping in a plastic bag after unplugging and removing the cord.

Safety and Warnings:

1. Do not place a dish, saucer, or anything that would collect moisture under the lamp.
2. Unplug from outlet before putting on or taking off parts, or before covering the lamp with any material.
3. Use Salt Lamp only for intended purposes, and maintain close supervision when lamp is used by or placed near children and disabled persons.
4. Never operate Salt Lamp if it has a damaged cord or plug, is not working properly, or if it has been dropped into water.
5. During use, Salt Lamps may exhibit sweating of moisture that can damage appliances, finished furniture, and other materials.

Keep away from:

- Heated surfaces
- Direct sunlight
- Water or liquids
- For household use only
- Non-edible
- Keep out of reach of children
- Handle with care
- Choking hazard

Important: To protect your furniture from damage, always keep your Luvin Life Salt Lamp on a place mat or coaster and keep away from delicate materials or household appliances.
